Gardening with Kids: Planting Seeds with Free Printable ...

Moisten the soil before you plant your seeds. (If you water the soil after planting your seeds, the water can shift the seeds around.) 2. Look at your seed packet for directions on how deep to plant your seeds. Plant 2-3 seeds per compartment. (Our seeds were so tiny I'm sure a few extra escaped our hands!) 3.

Plant Graph

During a study of plants, we made some predictions about how we think plants grow. We graphed our predictions on chart paper. Later on, we discovered more about these plants through books we read or through observation whenever possible. I didn't point out the facts to the children, but allowed them to discover it on their own.

Life Cycle of a Plant for Kindergarten | Sciencing

Once the plant is fully grown, it is a mature plant, sometimes called an adult plant. Its roots are deep in the ground and it has all its leaves, which work hard to make food for the plant. The plant can now make its own seeds and start the life cycle all over again. Many produce flowers that bees, butterflies and other animals help pollinate.
